

Notes from ITR Meeting on 6/24/2005

- Project Information
 - Reminder: Annual Report due to NSF 7/3/2005
 - ♦ Requested publication information and summaries of contributions from each team (by end of June)

- Current research status
 - Dr. Chow's team:
 - ♦ Submitted report information and reviewed with project group.
 - ♦ Resource allocation problem – layout of sample plate process presented. Will develop clear assumptions for problem. Still working on development of cost functions.
 - ♦ Revised delay block for Petri net simulation.
 - Dr. St. Amant's team:
 - ♦ Will be following path (2): Use CTA information to develop SHAKEN lisp code which can be used in PDDL and convert G2A to use PDDL code to produce ACT-R model.
 - ♦ Looking into compiler theory/technology to assist with support framework in development.
 - Dr. Kaber's team:
 - ♦ Requested data needs from other teams:
 - Videotape equipment on line (e.g. barcoder processing plates).

- Important dates
 - Next meeting – will schedule upon Dr. Kaber's team returning from Rostock (August).
