The World is Changing

The US Needs to Adapt and Change

Consider India

Alan L. Tharp, Alumni Distinguished Professor Emeritus

An Enthusiasm for Knowledge
information - the process of knowing

Since there is not enough space on a map to show everything, symbols, lines, numbers, distance, and other things, a map without this information would not be useful.

Different symbols and symbols are used to give information on a map.

1. How is a globe useful? Write some limitations of a globe.
   1. A globe can represent the earth in a different way.
   2. It shows the distribution of land and water on the surface of the earth.
   3. We can also see the correct shape, size, and location of the continents and oceans on a globe.

A globe had some limitations.
1. A large globe is difficult to carry.
2. Space is limited and that all small details cannot be shown on a globe.
3. It is not possible to make a globe for an entire earth.
4. Only one side of the earth can be seen at one time.

10.6.11

2. How do maps help us? Why are maps like accurate than a globe?
3. A map is a two-dimensional representation of the whole or a part of the earth. We can show many things together like mountains, rivers, roads, towns, cities, etc. Maps give us more information. Maps being two-dimensional can show the curved surface of the earth.
